

Vibration/Flame Sensors

VIS-0030A

Product Specifications

1. Application

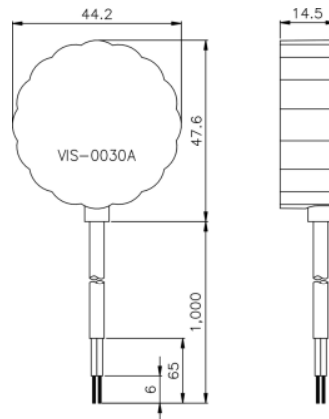

The VIS-0030A is designed to protect CD-ATM machines against any burglary as using dual sensors of PZT and photodiode.

2. Features

- Patented CD/ATM machine protection sensors to detect shocks or flames on the CD/ATM machines
- Dual sensor technology of PZT sensors and photo diode for reliable detections
- Patented structure based on advanced optical technology provides 360° maximized security
- State-of-the-art False alarm protection circuits to prevent from accidental shock or lighting to trigger alarms
- NO (circuit short for alarm triggering) switch

3. Dimensions

4. Specifications

Model	Carry Current		Output Condition	
	Alert	Detect	Detect	Output Signal Holding Time
VIS-0030A	Under 50 μ A	Under 50mA	Under 1volt	1.5 second

The specification is subject to change without any prior notice for the improvement or modifications
